Name. Name of instructor/student being observed

Jason Ma

Q19. Instructor/student role

TA

Observer. Name of observer

Kristen Gerondelis

Q20. Observer role

Teaching Coordinator

Date. Date and time of observation

2/22/24 3:05pm (recording)

Location. Location

Reuben-Cooke 130

Course. Course #

Math 221

 # students. Number of students

30

Q16. Instructor's teaching goals (if available):

1. Pace and tone of my lecturing; 2. Living writing on tablet

Q16. Use this scale to score each item: 1 is minimally to 5 is completely

Prep. Preparation

	1	2	3	4	5	N/A
Demonstrates knowledge of content	○	○	○	○	●	○
Demonstrates knowledge of students (names, backgrounds, cultures, abilities)	○	○	●	○	○	○
Prepared to teach	○	○	○	○	●	○

Envir. Classroom Environment

	1	2	3	4	5	N/A
Creates an environment of respect and rapport: is friendly, inclusive, approachable	○	○	○	●	○	○
Manages classroom logistics and procedures	○	○	○	○	○	●
Students are actively engaged	○	○	○	●	○	○
Students participate in classroom discussion	○	○	○	●	○	○
Students engage with other students in their learning	○	○	○	○	○	●

Instruction. Instruction

	1	2	3	4	5	N/A
States what students will be learning: outcomes, review	○	○	●	○	○	○
Speaks clearly and with positive tone	○	○	○	●	○	○
Demonstrates patience and understanding	○	○	○	●	○	○
Demonstrates focus, makes eye contact	○	○	●	○	○	○
Pacing provides time for students to think, discuss, answer	○	○	○	●	○	○
Board work is orderly, legible, consistent, includes diagrams	○	○	○	○	●	○
Promotes active learning: asks students to explain thinking, allows for discussion	○	○	●	○	○	○
Facilitates group work	○	○	○	○	○	●
Asks a variety of questions w/appropriate wait time	○	○	○	●	○	○
Checks for understanding	○	○	○	●	○	○

Success. Success - what is going well?

Great wait time at beginning when students have a lot of questions. You wait after you give an answer to a student's question and check to see if they understood. You are patient and answer questions well Jason! Students are comfortable asking you questions and there is a lot of interaction. You answer questions well and give students time to express themselves when you don't fully understand what they are asking.

Challenges. Challenges - what needs support?

You look at the screen and point and this works sometimes but other times it would be good if you can use the iPad to highlight and circle what you are referring to as it is easier for students to see. Keep an eye on time and try to wrap up with an outro of some kind: summary of what did in lesson, how the material fits into the bigger picture of the course, etc.
