Q21. **DUKE MATH OBSERVATION FORM**
Your responses to this form will be given to the person being observed, so please write it **directly to them**.
Thank you for taking the time to give detailed and objective feedback, as this is essential for growth.

Name. Name of instructor/student being observed

Jason Ma

Q19. Instructor/student role

TA

Observer. Name of observer

Leslie Saper

Q20. Observer role

Instructor

Date. Date and time of observation

April 4, 2024 at 4:40pm - 5:15pm

Location. Location

Reuben-Cooke 130

Course. Course #

Math 221/721 Section 2

 # students. Number of students

26 (approximately)

Q16. Instructor's teaching goals (if available):

Prove two important properties of the determinant: (1) the determinant of a product equals the product of the determinants, and (2) the determinant of a transposed matrix equals the determinant of the original matrix.

Q16. Use this scale to score each item: 1 is minimally to 5 is completely

Prep. Preparation

	1	2	3	4	5	N/A
Demonstrates knowledge of content	○	○	○	○	●	○
Demonstrates knowledge of students (names, backgrounds, cultures, abilities)	○	○	○	○	○	●
Prepared to teach	○	○	○	○	●	○

Envir. Classroom Environment

	1	2	3	4	5	N/A
Creates an environment of respect and rapport: is friendly, inclusive, approachable	○	○	○	○	●	○
Manages classroom logistics and procedures	○	○	○	○	●	○
Students are actively engaged	○	○	○	○	●	○
Students participate in classroom discussion	○	○	○	○	●	○
Students engage with other students in their learning	○	○	○	○	○	●

Instruction. Instruction

	1	2	3	4	5	N/A
States what students will be learning: outcomes, review	○	○	○	○	●	○
Speaks clearly and with positive tone	○	○	○	○	●	○
Demonstrates patience and understanding	○	○	○	○	●	○
Demonstrates focus, makes eye contact	○	○	○	○	●	○
Pacing provides time for students to think, discuss, answer	○	○	○	○	●	○
Board work is orderly, legible, consistent, includes diagrams	○	○	○	○	●	○
Promotes active learning: asks students to explain thinking, allows for discussion	○	○	○	○	●	○
Facilitates group work	○	○	○	○	○	●
Asks a variety of questions w/appropriate wait time	○	○	○	○	●	○

Checks for understanding	○	○	○	○	◉	○

Success. Success - what is going well?

He presented a significant amount of material clearly within the planned time while not appearing to rush. He started with pre-written slides and then shifted into writing slides as he lectured; a nice balance. His writing on the slides was extremely neat, far better than mine. Students were very comfortable asking questions at several points. He answered well (except for just one at the end which to his credit he admitted he could not explain and let me do it.) The students applauded him at the end.

Challenges. Challenges - what needs support?

Not much in my opinion. He had a just slight bit of stiffness at first which more practice should resolve.

Next. Additional thoughts, questions, ideas
