Name. Name of instructor/student being observed

Jason Ma

Q19. Instructor/student role

TA

Observer. Name of observer

Leslie Saper

Q20. Observer role

Instructor

Date. Date and time of observation

Thursday, February 22, 2024, 3:05pm - 4:00pm

Location. Location

Reuben-Cooke 130

Course. Course #

Math 221-01

 # students. Number of students

34

Q16. Instructor's teaching goals (if available):

Linear independence, Basis, Examples, Proof of existence of basis

Q16. Use this scale to score each item: 1 is minimally to 5 is completely

Prep. Preparation

	1	2	3	4	5	N/A
Demonstrates knowledge of content	○	○	○	○	●	○
Demonstrates knowledge of students (names, backgrounds, cultures, abilities)	○	○	●	○	○	○
Prepared to teach	○	○	○	●	○	○

Envir. Classroom Environment

	1	2	3	4	5	N/A
Creates an environment of respect and rapport: is friendly, inclusive, approachable	○	○	○	○	●	○
Manages classroom logistics and procedures	○	○	○	○	●	○
Students are actively engaged	○	○	○	○	●	○
Students participate in classroom discussion	○	○	○	○	●	○
Students engage with other students in their learning	○	○	○	○	○	●

Instruction. Instruction

	1	2	3	4	5	N/A
States what students will be learning: outcomes, review	○	○	○	●	○	○
Speaks clearly and with positive tone	○	○	○	●	○	○
Demonstrates patience and understanding	○	○	○	●	○	○
Demonstrates focus, makes eye contact	○	○	○	●	○	○
Pacing provides time for students to think, discuss, answer	○	○	○	○	○	●
Board work is orderly, legible, consistent, includes diagrams	○	○	○	○	●	○
Promotes active learning: asks students to explain thinking, allows for discussion	○	○	●	○	○	○
Facilitates group work	○	○	○	○	○	●
Asks a variety of questions w/appropriate wait time	○	○	○	●	○	○
Checks for understanding	○	○	○	●	○	○

Success. Success - what is going well?

Jason had a great rapport with the students. Even while teaching extremely complex material the students were relaxed enough to ask many questions, re-ask if the answer was not clear and even laugh a little.

Challenges. Challenges - what needs support?

Jason likes to give intuitive explanations of many concepts along with precise proofs. This is great but sometimes I felt the students picked up the intuitive language (this was evident in their questions) and this could cause later problems.

Next. Additional thoughts, questions, ideas

At least once I thought Jason did not fully understand the thrust of a student's question/misunderstanding. He has to practice working to be sure he understands the issue, perhaps by asking the student to restate in other words. The instructor knows the material so well that it takes time for an instructor to learn how a student can be confused.
