Q21. **DUKE MATH OBSERVATION FORM**
Your responses to this form will be given to the person being observed, so please write it **directly to them**.
Thank you for taking the time to give detailed and objective feedback, as this is essential for growth.

Name. Name of instructor/student being observed

Jason Ma

Q19. Instructor/student role

TA

Observer. Name of observer

Kristen Gerondelis

Q20. Observer role

Teaching Coordinator

Date. Date and time of observation

4/4/24 4:40pm

Location. Location

Reuben-Cooke 130

Course. Course #

Math 221

 # students. Number of students

20

Q16. Instructor's teaching goals (if available):

➢ Live writing on tablet (make fonts larger and more legible); ➢ Pace and tone of my lecturing; ➢ Time control (goal: under 30min); ➢ Interaction with students (ask students fill in some details of a proof).

Q16. Use this scale to score each item: 1 is minimally to 5 is completely

Prep. Preparation

	1	2	3	4	5	N/A
Demonstrates knowledge of content	○	○	○	○	●	○
Demonstrates knowledge of students (names, backgrounds, cultures, abilities)	○	○	○	○	○	●
Prepared to teach	○	○	○	○	●	○

Envir. Classroom Environment

	1	2	3	4	5	N/A
Creates an environment of respect and rapport: is friendly, inclusive, approachable	○	○	○	○	●	○
Manages classroom logistics and procedures	○	○	○	○	○	●
Students are actively engaged	○	○	○	○	●	○
Students participate in classroom discussion	○	○	○	●	○	○
Students engage with other students in their learning	○	○	○	○	○	●

Instruction. Instruction

	1	2	3	4	5	N/A
States what students will be learning: outcomes, review	○	○	○	●	○	○
Speaks clearly and with positive tone	○	○	○	●	○	○
Demonstrates patience and understanding	○	○	○	○	●	○
Demonstrates focus, makes eye contact	○	○	○	●	○	○
Pacing provides time for students to think, discuss, answer	○	○	○	○	●	○
Board work is orderly, legible, consistent, includes diagrams	○	○	○	○	●	○
Promotes active learning: asks students to explain thinking, allows for discussion	○	○	●	○	○	○
Facilitates group work	○	○	○	○	○	●
Asks a variety of questions w/appropriate wait time	○	○	○	●	○	○

Checks for understanding	○	○	○	○	◉	○

Success. Success - what is going well?

Nice humor at the beginning of class. Good review at beginning of class. Nice job with using the tablet! You can tell you've practiced and worked at this. I like how you highlight what you're talking about with the red pen. Slide is very clear - your handwriting is amazing. You do a nice job with the review and asking if they have questions. You check in with a student to be sure your response makes sense to them. Great job writing your goals. You ask for student input when writing the proof (one of your goals) - wonderful! Students are very engaged. You pause after sections and just look at students - this is really great. Gives them time to finish writing and potentially ask for any clarification. Students are comfortable asking you questions.

Challenges. Challenges - what needs support?

You asked if anyone had any questions (after Case 2. B is nonsingular) and someone had their hand up but you moved on. Luckily they raised their hand again and you caught it! Timing - you were hoping to finish in 30 minutes - it's been 35m so far and you're still on it, but your pace seems good for students so I'm not sure if going faster would work well.

Next. Additional thoughts, questions, ideas

Your writing/font is very large - which is great! In the beginning I was worried you may not be able to fit enough on the screen but it seems to be going okay. Nice job accomplishing your goals!
