Duke University - Trinity and Pratt Undergraduate Programs
Undergraduate Course Evaluations - Fall 2022

Course: MATH-111L-10L: LABORATORY CALCULUS I.MATH-111L-10L.

Instructor: Shira Viel *

TA: WILLIAM JOSHUA KING,Jiajie Ma

Response Rate: 18/29 (62.07 %)

10 - In what ways did the teaching assistant(s) facilitate your learning and what might have helped even more? Include any constructive comments you'd like to share with Jiajie Ma here.

Response Rate	14/29 (48.28%)

- Was helpful with homework. Aided our understanding of lab problem sets.
- The TA was able to answer any questions my group had in discussion and was willing to help and asked if we needed help consistently throughout discussion and did a good job explaining problems.
- Jiajie Ma was pleasant to work with. Even though he had access to answer keys asking questions of him and working through problems with him felt like working with one of my fellow Math 111L students.
- He was always very helpful and had a great attitude
- He seemed to really know the content and any questions that we had he was able to answer completely and in an understandable way. He also stayed after class in order to make sure that everyone got all of their questions answered and I really appreciated his commitment to our learning.
- jason is the best !! Very clear w explanations and makes sure you understand the problem :)
- They did a good job of providing one-on-one help during lab class. I especially enjoyed how they were engaging when reviewing the material in lecture.
- Overall, our TAs were supportive and clear in their explanations. Toward the beginning of the semester, I felt that our mini lectures at the start of discussion weren't that effective because they were not necessarily in line with the way/problem setup Professor Viel was teaching but that improved as time went on. Jason was very responsive to questions and made himself available outside class if needed. It was clear that he cared about our learning.
- He was also very open to helping and answering student's questions.
- They were very helpful when I would ask them individual questions after the lab or during the lab and they were always super nice, but I just thought their explanations in the beginning of the class were often unclear. It might be helpful for them to have the slide deck from class open and to just revisit important parts of it rather than try to explain from scratch on their own. Jiajie Ma in particular always brought a very postive, happy energy to the lab which I really appreciated!
- Jason was very eager and happy to help and answer questions. In my experience he always knew how to answer the questions my lab group had.
- Jiajie was also extremely helpful. Always willing to explain concepts and emphasize with our struggles.
- Jason was such an amazing TA! not only did he assist us during lab, but was responsive outside of lab and also was always reminding us that we could do it and that we were capable! He is such a positive force and i learned so much from him!
- Jason was amazing, helped us with problems without just giving us the answer, allowing us to think it through

9 - Based on the effectiveness of instruction (clarity, expertise, enthusiasm, rigor, support, inspiration, etc), overall the teaching assistant, Jiajie Ma, was

- Jason is great at explaining but needs to slow down a bit. I think some kids get lost when he's going too fast.
- He also helped me whenever I had a question and he was always very helpful.
- Homework help and explaining stuff
- They led lab very well, created great one pager summaries for us to review, and supported us throughout the process very well.
- Jason is extremely intelligent and uses his math proficiency to help us handle difficult questions.
- Jason Ma did about the same. The language barrier was sometimes difficult, but overall he was very helpful and obviously very informed.
- Jason is really good at guiding us in the right direction. He never fails to help us understand the content.
- They were both such nice and understanding people. They would really focus on encouraging our learning, while also making sure to respect our time.
- Jason was super engaging when he went through reviews of the math content and was also happy to help whenever I was struggling with content.
- Jason was always enthusiastic to come help us during lab and was excited to engage with us and teach us. Also, he was good at explaining the content and took extra time to answer specific questions I had outside of lab time.
- The team that Jason and Sarah made was truly central to my understanding of this course. I could not have done this without them.
- Literally the best TA's ever, he would always do his rounds and check people's work, he could spot a faulty explanation or messed up math from across the room. he was so nice and patient. he would try to guide you through a mistake, and when he recognized a hole, he'd teach from there. also he was always just fun, like everyone loves him. him and sarah had such a good dynamic. both were incredibly helpful and patient, sarah was the calm assurance and jason was the enthusiastic math angel. both were so good. 490312908/10
- You're the best, Jason
- Jason was great in clarifying any doubts or questions we had about the course material in labs.
- Jason was also very helpful and I hope he would consider being a teaching assistant again! Made lab feel more comfortable and provided great feedback. Very funny guy too
